# HEALTHCARE SAFEWARE®

YOUR ALL-IN-ONE SaaS TOOL FOR ACTIONABLE INSIGHTS

Healthcare Safeware® is a SaaS solution created to support the Continuous Organizational Improvement, Innovation and Learning (COI2L) lifecycle. It is designed to learn from frontline experiences by providing a place for the findings to be recorded, aggregating data and creating visualizations of the data. The output of the registry includes measurable and discrete findings in order to create actionable information.

DESIGNED BY FRONTLINE STAFF FOR FRONTLINE STAFF

Healthcare Safeware® is is designed for frontline staff to review cases with our built-in frontline-derived healthcare event nomenclature. This allows for hidden Opportunities for Improvement (OFIs) in care to be identified, recorded and reported with greater accuracy.

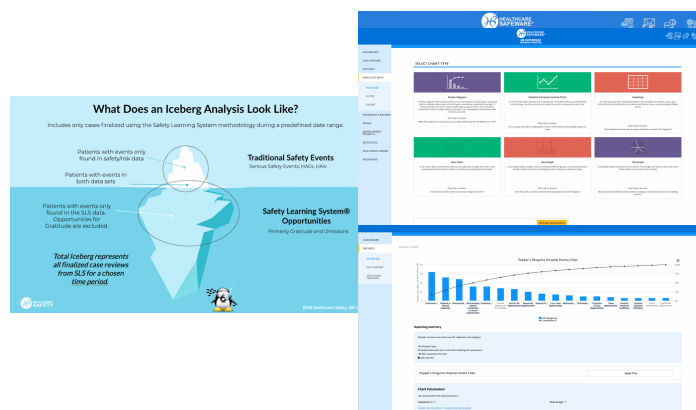

CENTRAL REGISTRY & WORKFLOW PROCESS SUPPORT

Healthcare Safeware® is a web-based central registry that can be easily accessed with an internet connection. The system is designed with a workflow process support that facilitates and manages our clinically validated process for case reviews: The Safety learning System®.

INSPIRE & INFLUENCE LEADERS WITH EFFECTIVE REPORTING

Healthcare Safeware® provides multiple options for data interpretation and export for analysis and reporting including: paretos, heat maps, and our unique iceberg analysis.

ONLY THE BEST WHEN COMPARED TO THE REST

We strive to help organizations on their journey towards becoming a High Reliability Organization with established learning health systems. As a result, we are the ONLY systems improvement technology with an embedded organizational learning methodology *and* standardized frontline-derived healthcare event nomenclature.

Competitor Analysis Comparison as of February 2022:

	Healthcare Safeware®	RL Datix	Press Ganey HRP	Qualtrics	Midas
